## Chapter 2

# Class Documentation

### 2.1 multiTool.tomodata Class Reference

#### Public Member Functions

- `def \_\_init\_\_ (self)`  
*Initialization of the data.*
- `def maskNamesGetter (self, maskfile)`  
*Keep the ROI's in a dictionary.*
- `def roimask_reader (self, base, fname)`
- `def get\_totalbeamlets (self, base, fname)`  
*Get the total number of beamlets.*
- `def get\_dim (self, base, fname)`  
*Get the dimensions of the voxel big space.*
- `def BigToSmallCreator (self)`  
*Create a map from big to small voxel space, the order of elements is preserved but there is a compression to only one element in between.*
- `def getNumProjections (self)`
- `def removezeroes (self, toremove)`
- `def removebixels (self, pitch)`
- `def readWeiguosCase (self)`  
*Read Weiguo's Case.*
- `def maxTgtDoses (self, numProjections, k10)`

#### Public Attributes

## 2.1.1 Member Function Documentation

### 2.1.1.1 BigToSmallCreator()

```
def multiTool.tomodata.BigToSmallCreator (
    self )
```

Create a map from big to small voxel space, the order of elements is preserved but there is a compression to only one element in between.

The documentation for this class was generated from the following file:

- multiTool.py
